

HOW TO PLAY

001 CALL FOR QUALITY TIME

Blackout is a game designed for PC, which you can take the most out of from spending some quality time with your machine. Get acquainted with maneuvering both the keyboard and the mouse at the same time - these will be much needed to move your character and cast abilities.

002 MOVE AROUND

In order to move your character and give initiation to your journey, all you have to do is press the keys accordingly to which direction you'd like to navigate from.

003

GET READY FOR ACTION

The following keys will help you throughout your journey. While some directly give power to actions, others will let you explore menus such as the abilities tab.

004

ONE LAST THING

Keep your mouse close when playing, you'll need it to select abilities. All you have to do is keep the TAB key pressed in order to hover through the abilities. Left-click to select one.

KEEP PRESSED TO ACTIVATE SHIELD

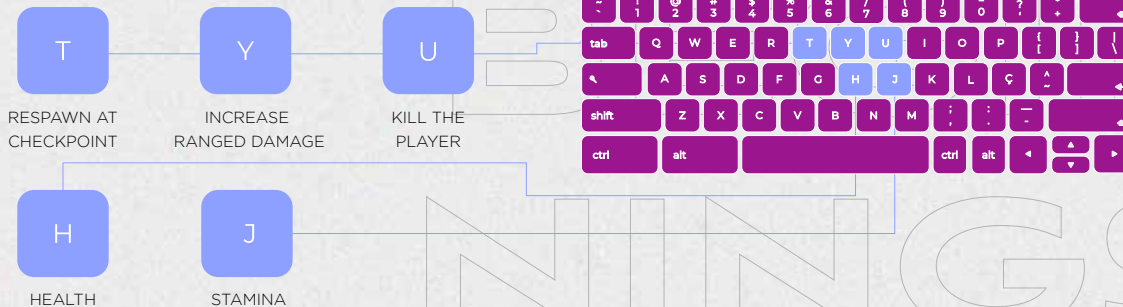

FIRES A BOLT UNDER RANGED

CHEATS

001 FOR EASY BEGINNINGS

We've decided, as the amazing team that we are, that it was only fair to also include a set of cheats that can propel you into an easier state of gameplay. Feel free to use them whenever you need, and thank us later.

Respawn - press T to respawn at the last saved checkpoint

Stamina - press J to restore some of the lost stamina

Health - press H to restore some of the health lost from damage

004 CHEAT [Y, U, H, J] - these keys are so you can do a quick exploration of the game and/or for our own testing of new feature or bugs
